October 2012

D & K wishes to assure you that our polypropylene and polyester thermal laminating and encapsulation films comply with the requirements of the USA Federal Food, Drug and Cosmetic Act, which are applicable to material used as articles intended for use in processing, handling and packaging food for human consumption.

Specifically, our polyester (PET) film meets the specifications as listed in 21CFR177.1630.

Our polypropylene (OPP) film meets the specifications as listed in 21CFR177.1520.

The adhesive layer on our films, together with the primers used, meet the specifications as listed in 21CFR177.1350, paragraphs 9a), (b) and (c).

Further, films can be irradiated with gamma rays for sterilisation purposes.

When used as intended, no special hazards are anticipated under normal conditions encountered in storage, processing and disposal.

These films are produced in accordance with Good Manufacturing Practices and meet all necessary specifications.

For and on behalf of
D & K Europe Ltd

Robin French
Managing Director
